## **Conics**

Non-Calculator

- 1. Find the vertex, focus and directrix of the parabola:  $(x + 1)^2 = 12(y - 3)$
- 2. Write the standard form of the equation of the parabola whose vertex is at (0,2) and focus at (0,5).

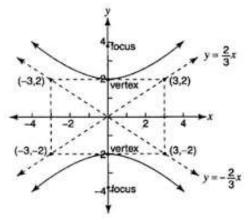

3. Sketch the graph of:  $\frac{(x+2)^2}{16} - \frac{(y+1)^2}{9} = 1$ . Label the center, vertices, and foci

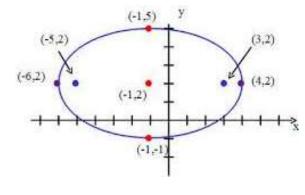

4. Identify the type of conic and find the center, vertices, and foci:  $\frac{(x-2)^2}{25} + \frac{y^2}{16} = 1$ 

$$\frac{(x-2)^2}{25} + \frac{y^2}{16} = 1$$

5. Write the equation of the conic from the given graph.

**6.** Write the equation of the conic from the given graph.

## Calculator

For each problem, identify the type of conic section and any key features of the conic section.

7.  $\frac{(x-2)^2}{25} - \frac{(y+3)^2}{4} = 1$ 8.  $(x+4)^2 + y^2 = 11$ 

7. 
$$\frac{(x-2)^2}{25} - \frac{(y+3)^2}{4} = 1$$

$$8. (x+4)^2 + y^2 = 11$$

**9.** 
$$(y+1)^2 = 5(x-3)$$

10. 
$$\frac{y^2}{21} + \frac{(x-1)^2}{16} = 1$$
