

**L'Hôpital's Rule**

Evaluate each limit.

$$1. \lim_{x \rightarrow 3} \frac{x^2 - 9}{x - 3}$$

$$2. \lim_{x \rightarrow 2} \frac{\sqrt{x+2} - 2}{x - 2}$$

$$3. \lim_{x \rightarrow \infty} \frac{x^2 - 9}{x - 3}$$

$$4. \lim_{x \rightarrow \infty} \frac{x - 3}{x^2 - 9}$$

**L'Hôpital's Rule**

If  $\lim_{x \rightarrow a} f(x) = 0$  and  $\lim_{x \rightarrow a} g(x) = 0$

and  $f(x)$  and  $g(x)$  are differentiable and where  $g'(a) \neq 0$ ,

then  $\lim_{x \rightarrow a} \frac{f(x)}{g(x)} = \lim_{x \rightarrow a} \frac{f'(x)}{g'(x)}$ .

What does this mean?

## Using L'Hôpital's Rule

Example 1:

$$\lim_{x \rightarrow 3} \frac{x^2 - 9}{x - 3}$$

Example 2:

$$\lim_{x \rightarrow 2} \frac{\sqrt{x+2}-2}{x-2}$$

Example 3:

$$\lim_{x \rightarrow \infty} \frac{x^2 - 9}{x - 3}$$

Example 4:

$$\lim_{x \rightarrow \infty} \frac{x-3}{x^2 - 9}$$
