| AP-Style Answer | 3 decimal places |
| :---: | :---: |
| Continuity | limit of function from left $=$ limit of function from right $=f(x$-value $)$ (no jumps, holes, or asymptotes) |
| Differentiability | 1) no discontinuities (no jumps, holes, or asymptotes) <br> 2) no sharp turns (derivative from left = derivative from right) <br> 3) no vertical tangent lines |
| Derivatives | $\mathrm{f}, \mathrm{f}^{\prime}, \mathrm{f}^{\prime \prime}$ ( $\mathrm{f}^{\prime \prime \prime}$ is just a jerk)] <br> position, velocity, acceleration |
| Riemann Sums | Left, right, midpoint (ok +1 trapezoid) |
| Value Theorems | EVT (extremes, abs max/mins), <br> IVT (\# in between), <br> MVT ( $\boldsymbol{m}$, slope of tangent line $=$ slope of secant line) |
| Critical Points | Rel max, Rel min, Neither |
| Volume | Disk, Washer, Cross section |
| BC Topics | Polar, Parametric, Vectors, |
|  | Partial Fractions, L' Hôpital's Rule, Euler's Method, Length of a Curve, Improper Integrals, Logistic Functions, Taylor Series, LaGrange Error Bound, Convergence of Series |
