

## **U and US in Calculus Study Groups**

Doing well in Calculus is a team effort; there is both you and us in Calculus. You will meet once each week with a study group until the AP Exam in May. Each week ends on Fridays at 2:05pm (end of 5<sup>th</sup> hour). You may meet for a minimum of either one hour before/after school or for 2 half-hours during supervision. You can always choose to meet for more time.

The total number of students in your study group should be 3 to 5, including you. Meeting in your study group will count as a homework assignment. Group members must be of the same course (all AB or all BC), but AB groups can invite BC students to visit their group to give extra help. BC students are encouraged to find out if AB groups need help.

You do not have to meet with the same students each week. Your goal should be to find a group that fits right.

Each time you meet, you will need to fill out the study group form found at <http://goo.gl/forms/qZjlgTdFuc> or at [www.mathkanecton.com](http://www.mathkanecton.com) on the AP Calculus AB or BC home page. You must log your study group session when your study group meets. End your study group session 5 minutes early to fill out the study group form.  
*Late submissions will NOT be accepted.*
